Core Group Table dimensions
Clear picture of Core group table
Underneath the core group table
Leg and brace joined together with 1 bolt, 2 washers and a nut. The washers are on both sides. There are 4 joints like this one on a core group table. This join is where the 149cm long transverse plank meet with 81cm long leg.
How to take Care and Maintain Core group Tables

Hardwood furniture in most cases does not appear nice when varnished and painting distorts the texture of the hardwood.

For core group tables we prefer boiled linseed oil which makes the furniture appear natural and beautiful. The linseed oil can be applied once or twice within a year. It must be applied on a rain free day and not very hot. Make sure there is no rain in the next 24 hours before oiling the tables.

How to apply boiled linseed oil

1. Mix 40% of boiled linseed oil and 60% of mineral turpentine and stir well before application.
2. Dip a clean dry soft cloth in the solution and rub it gently on the smooth sand papered furniture. Make sure it covers well the furniture.
3. Let it dry over night before application of second coat.
4. Mix 60% of boiled linseed oil and 40% of mineral turpentine, then stir well before application.
5. Use a cloth again to rub the mixture on the table and let it dry over night before use.
